

CULTIVATE

Crop Science Fall Weekend

October 24-26, 2014, NC State University

High school-aged youth (rising sophomores, juniors and seniors) are invited to apply to a weekend, residential agronomy experience on the campus of NC State University. Youth will have hands-on opportunities to explore a broad range of Crop Science possibilities from breeding and enhancing crops, learning sustainable production practices and delving into practical tools that enhance our understanding of plant processes. Participants will visit a variety of agriculture field sites, including our NCSU Crops Teaching Garden, Agroecology Student Farm and others. Youth will also be introduced to career possibilities, college-making decisions and enjoy evening entertainment and team-building activities.

Apply now at <http://go.ncsu.edu/cultivate> by Friday, October 17th. The cost of the weekend will be \$40 and includes lodging, all meals and innovative workshops. For more information, visit the **CULTIVATE** website at <http://www.growforit.org/programs/detail/cultivate>.
